

Figure 2: k-mers identify cell types across individuals and across species and recapitulate known biology

A

Mouse:mouse and mouse:human cell type assignment accuracy across DNA, protein, dayhoff space

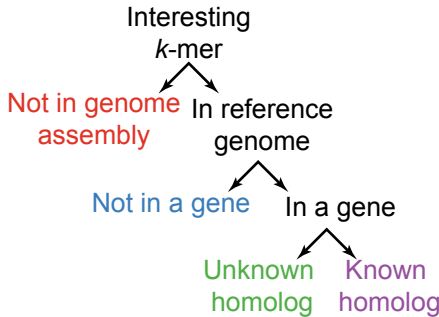

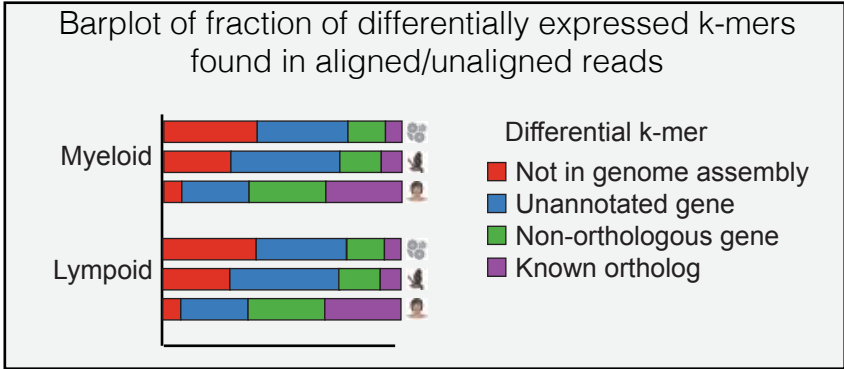

B

Adjusted Rand Index of mouse:mouse and human:human cell type assignment

C

Differential k-mer expression results in similar gene lists as differential gene expression

D

E

Show detection of non 1:1 orthologs via Sourmash search containment of orthogroups
